Northridge Institute of Technology - Student Handbook (Demo)

This demo handbook belongs to the fictional Northridge Institute of Technology and exists only to test the CiteIt application. The institute offers undergraduate programs in Artificial Intelligence, Computer Science, Electrical Engineering and Business Analytics. Classes begin in the first week of September and the academic year is divided into two semesters of sixteen weeks each. The main campus has eleven academic blocks, a central library, a sports complex and two student cafeterias.

Admission Requirements

Applicants to the Artificial Intelligence program must have completed twelve years of schooling with mathematics and physics. The minimum eligibility is sixty percent marks in the final school examination. Applicants must also pass the Northridge Entrance Test, which contains sections on mathematics, logical reasoning and English. A score of at least fifty out of one hundred is needed to be shortlisted. Shortlisted candidates are called for a short interview with two faculty members.

Important Dates and Deadlines

The application portal opens on the first of March. The last date to submit an application is the thirtieth of June. The entrance test is held on the fifteenth of July in all partner cities. Merit lists are published on the first of August. Selected students must pay the first installment of fees by the twentieth of August to confirm their seat. Orientation week starts on the twenty fifth of August.

Tuition and Fees

The tuition fee for the Artificial Intelligence program is four hundred thousand rupees per academic year, payable in two equal installments. A one-time admission fee of fifty thousand rupees is charged at enrollment. A refundable security deposit of twenty thousand rupees is collected from every student. Hostel accommodation costs an additional one hundred and twenty thousand rupees per year, including meals. Late payment of any installment attracts a penalty of two percent per month.

Scholarships and Financial Aid

Northridge offers three types of scholarships. The Merit Scholarship covers fifty percent of tuition for students who score above ninety percent in the entrance test. The Need-Based Grant covers up to one hundred percent of tuition for families whose annual income is below a published threshold, subject to an interview. The Outreach Scholarship supports talented students from remote regions. Scholarships are renewed every year if the student maintains a grade point average of at least three point two.

Attendance and Grading Policy

Students must attend at least seventy-five percent of lectures in every course to be allowed to sit the final examination. Grades are awarded on a four point scale. An A grade equals four points, a B equals three points, and a C equals two points. A student whose cumulative grade point average falls below two point zero for two consecutive semesters is placed on academic probation. Each course is assessed through quizzes, a midterm examination and a final examination.

Library and Campus Facilities

The central library is open from eight in the morning until ten at night from Monday to Saturday, and from ten to four on Sunday. Students may borrow up to five books at a time for fourteen days. The computer laboratory has two hundred workstations and a graphics processing cluster available to Artificial Intelligence students. Wireless internet is available across the campus. The sports complex includes a cricket ground, two basketball courts and a swimming pool.

Contact Information

For admission queries, contact the admissions office at admissions at northridge dot example. The office is open on working days from nine in the morning to five in the evening. For fee related questions, contact the finance office located on the ground floor of Block A. Students facing difficulties may also approach the counseling center, which offers confidential support free of charge.
